## Zeolite Characterization and Catalysis: A Tutorial

The idea for putting together a tutorial on zeolites came originally from my co-editor, Eric Derouane, about 5 years ago. I first met Eric in the mid-1980s when he spent 2 years working for Mobil R&D at our then Corporate lab at Princeton, NJ. He was on the senior technical staff with projects in the synthesis and characterization of new materials. At that time, I managed a group at our Paulsboro lab that was responsible for catalyst characterization in support of our catalyst and process development efforts, and also had a substantial group working on new material synthesis. Hence, our interests overlapped considerably and we met regularly. After Eric moved back to Namur (initially), we maintained contact, and in the 1990s, we met a number of times in Europe on projects of joint interest. It was after I retired from ExxonMobil in 2002 that we began to discuss the tutorial concept seriously. Eric had (semi-)retired and lived on the Algarve, the southern coast of Portugal. In January 2003, my wife and I spent 3 weeks outside of Lagos, and I worked parts of most days with Eric on the proposed content of the book. We decided on a comprehensive approach that ultimately amounted to some 20+ chapters covering all of zeolite chemistry and catalysis and gave it the title Zeolite Chemistry and Catalysis: An integrated Approach and Tutorial.

### From reader reviews:

#### Joseph Thomas:

The book Zeolite Characterization and Catalysis: A Tutorial gives you the sense of being enjoy for your spare time. You can utilize to make your capable much more increase. Book can to become your best friend when you getting anxiety or having big problem with your subject. If you can make reading a book Zeolite Characterization and Catalysis: A Tutorial being your habit, you can get more advantages, like add your current capable, increase your knowledge about some or all subjects. It is possible to know everything if you like wide open and read a reserve Zeolite Characterization and Catalysis: A Tutorial. Kinds of book are a lot of. It means that, science e-book or encyclopedia or others. So , how do you think about this book?

#### Dee Alaniz:

Typically the book Zeolite Characterization and Catalysis: A Tutorial has a lot of knowledge on it. So when you check out this book you can get a lot of advantage. The book was published by the very famous author. The author makes some research just before write this book. This kind of book very easy to read you may get the point easily after scanning this book.

#### Delbert Lambert:

In this age globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Often the book that recommended for you is Zeolite Characterization and Catalysis: A Tutorial this e-book consist a lot of the information with the condition of this world now. That book was represented so why is the world has grown up. The language styles that writer use for explain it is easy to understand. The actual writer made some exploration when he makes this book. Here is why this book acceptable all of you.

#### Cindi Russell:

What is your hobby? Have you heard which question when you got scholars? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person including reading or as reading through become their hobby. You need to know that reading is very important as well as book as to be the issue. Book is important thing to provide you knowledge, except your current teacher or lecturer. You will find good news or update about something by book. Amount types of books that can you choose to use be your object. One of them are these claims Zeolite Characterization and Catalysis: A Tutorial.
