Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICHEM)

R. P. Chhabra, J.F. Richardson

Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICHEM) R. P. Chhabra, J.F. Richardson

This book bridges the gap between the theoretical work of the rheologist, and the practical needs of those who have to design and operate the systems in which these materials are handled or processed. It is an established and important reference for senior level mechanical engineers, chemical and process engineers, as well as any engineer or scientist who needs to study or work with these fluids, including pharmaceutical engineers, mineral processing engineers, medical researchers, water and civil engineers. This new edition covers a considerably broader range of topics than its predecessor, including computational fluid dynamics modelling techniques, liquid/solid flows and applications to areas such as food processing, among others.

* Written by two of the world's leading experts, this is the only dedicated non-Newtonian flow reference in print.

* Since first publication significant advances have been made in almost all areas covered in this book, which are incorporated in the new edition, including developments in CFD and computational techniques, velocity profiles in pipes, liquid/solid flows and applications to food processing, and new heat/mass transfer methods and models.

* Covers both basic rheology and the fluid mechanics of NN fluids ? a truly self-contained reference for anyone studying or working with the processing and handling of fluids

From reader reviews:

Linda Amos:

Have you spare time for the day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a stroll, shopping, or went to the Mall. How about open or read a book entitled Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICChemE)? Maybe it is to get best activity for you. You recognize beside you can spend your time together with your favorite's book, you can wiser than before. Do you agree with their opinion or you have various other opinion?

Ronda Caesar:

The book Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICChemE) gives you the sense of being enjoy for your spare time. You may use to make your capable a lot more increase. Book can being your best friend when you getting strain or having big problem using your subject. If you can make reading a book Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICChemE) to be your habit, you can get considerably more advantages, like add your own capable, increase your knowledge about many or all subjects. It is possible to know everything if you like open and read a publication Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICChemE). Kinds of book are a lot of. It means that, science reserve or encyclopedia or other folks. So , how do you think about this book?

Samuel Potter:

Reading a reserve can be one of a lot of action that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new information. When you read a publication you will get new information mainly because book is one of various ways to share the information or maybe their idea. Second, examining a book will make you actually more imaginative. When you reading through a book especially hype book the author will bring that you imagine the story how the people do it anything. Third, you could share your knowledge to others. When you read this Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-Heinemann/ICChemE), you may tells your family, friends and also soon about yours e-book. Your knowledge can inspire the others, make them reading a e-book.

Anna Humphrey:

In this age globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The book that recommended for your requirements is Non-Newtonian Flow and Applied Rheology: Engineering Applications (Butterworth-

Heinemann/ICChemE) this reserve consist a lot of the information of the condition of this world now. This specific book was represented how do the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The writer made some investigation when he makes this book. That's why this book suited all of you.
