Your Job And How Technology Will Change It Richard Lieberman

In the next few years, technology is set to change the way we work beyond recognition. Richard Lieberman, nationally recognised employment and IP expert, explains how every working person in every industry and profession will soon experience profound changes in their work as technology, social networking and virtual communications alter the way jobs have traditionally been performed. Lieberman documents how most people, particularly those over the age of 40, do not fully understand the nature of these changes and are worried about their ability to adapt to future job requirements. Lieberman explains not only what will happen to your job, but more importantly, how you can survive and prosper in the changing work world. While there have been many books about how technology is changing the world, this is the first book to examine how the technology revolution will affect you and your job.
