Genetic Control of Natural Resistance to Infection and Malignancy (Perspectives in Immunology)

Genetic Control of Natural Resistance to Infection and Malignancy (Perspectives in Immunology)

Genetic Control of Natural Resistance to Infection and Malignancy is a collection of papers presented at the 1980 Proceedings of an International Symposium of the Canadian Society for Immunology held in Montreal, Quebec. It provides information about the different models of genetic resistance to various diseases. The book offers an overview of the genetic determination of the susceptibility or resistance to infection and malignancy. It also discusses the importance of genetic resistance not only in the first-line observation of infections and tumors, but also in chemotherapy and immunotherapy. It then explains the genetic control of resistance to parasitic, bacterial, and virus infections, as well as to tumor growth. It further discusses the genetic control of macrophage differentiation and function.
