Boost.Asio C++ Network Programming John Torjo

In Detail

Network programming is not new and it's no secret that it's not an easy task. Boost.Asio provides an excellent level of abstraction, making sure that with a minimal amount of coding you can create beautiful client/server applications, and have fun in the process!

'Boost.Asio C++ Network Programming" shows how to build client/server applications using a library that is part of the popular peer-reviewed Boost C++ Libraries. It analyzes whether you should go synchronous or asynchronous and the role that threading plays, whilst providing examples you can run and extend for yourself.

After covering the fundamentals of Boost.Asio you'll discover how you can build synchronous and asynchronous clients and servers. You will also see how you can have your own asynchronous functions play nice with Boost.Asio. As a bonus, we will introduce co-routines, which make asynchronous programming a piece of cake. Nowadays, network programming is a must, no matter what type of programmer you are. "Boost.Asio C++ Network Programming" shows just how simple networking can be, if you're using the right tools.

Approach

What you want is an easy level of abstraction, which is just what this book provides in conjunction with Boost.Asio. Switching to Boost.Asio is just a few extra #include directives away, with the help of this practical and engaging guide.

Who this book is for

This book is great for developers that need to do network programming, who don't want to delve into the complicated issues of a raw networking API. You should be familiar with core Boost concepts, such as smart pointers and shared_from_this, resource classes (noncopyable), functors and boost::bind, boost mutexes, and the boost date/time library. Readers should also be familiar with "blocking" versus "non-blocking" operations.

From reader reviews:

Amanda Moberly:

Information is provisions for those to get better life, information today can get by anyone from everywhere. The information can be a information or any news even a problem. What people must be consider whenever those information which is in the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one the resource are convinced. If you obtain the unstable resource then you understand it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take Boost.Asio C++ Network Programming as the daily resource information.

Corey Smith:

Hey guys, do you wishes to finds a new book you just read? May be the book with the name Boost.Asio C++ Network Programming suitable to you? Often the book was written by popular writer in this era. Typically the book untitled Boost.Asio C++ Network Programmingis a single of several books that will everyone read now. This book was inspired many men and women in the world. When you read this publication you will enter the new dimension that you ever know just before. The author explained their thought in the simple way, consequently all of people can easily to be aware of the core of this book. This book will give you a great deal of information about this world now. In order to see the represented of the world on this book.

Stephen Phelps:

Your reading 6th sense will not betray you actually, why because this Boost.Asio C++ Network Programming book written by well-known writer whose to say well how to make book which can be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and producing skill only for eliminate your own personal hunger then you still uncertainty Boost.Asio C++ Network Programming as good book not just by the cover but also with the content. This is one guide that can break don't assess book by its deal with, so do you still needing yet another sixth sense to pick this!? Oh come on your reading through sixth sense already alerted you so why you have to listening to another sixth sense.

Joseph Levis:

Is it you actually who having spare time and then spend it whole day through watching television programs or just lying on the bed? Do you need something new? This Boost.Asio C++ Network Programming can be the reply, oh how comes? A book you know. You are therefore out of date, spending your extra time by reading in this new era is common not a geek activity. So what these ebooks have than the others?
