Development and Design of Heritage Sensitive Sites: Strategies for Listed Buildings and Conservation Areas

Kenneth Williamson

Development and Design of Heritage Sensitive Sites: Strategies for Listed Buildings and Conservation Areas Kenneth Williamson

This is the first book to provide readers with the skills to assess development potential from a holistic standpoint. Until now, architectural books on conservation matters have focused on preservation at a strategic level and restoration at a technical level. This book offers the architect, developer or planner the rules and tools needed to gauge development prospects in an objective and comprehensive manner.

Written by an expert in the field it provides the reader with:

- the latest legislation relating to heritage in the UK
- insight into local planning authorities and government advisory boards
- basic strategies for approaching developments
- an understanding of the options available for developing a heritage site
- illustrative case studies to highlight strategy successes.

This book is a one-stop-shop for any professional or student working in, or learning about, development in heritage environments.
