London After Recession: A Fictitious Capital? (Design and the Built Environment) Iain MacRury

The City has long been the main generator of London's wealth and, needless to say, the impact of the Economic Crisis in the recent years on the City has greatly affected the wider urban and surrounding region, not to say country as a whole. This book examines the impact of the recession and discusses London's future trajectory as an entrepreneurial city and capital of the United Kingdom. While recognising the enduring capacity of London to 'reinvent' itself - from being the centre of a vast Empire to becoming a global centre for financial and business services - contributors evaluate different dimensions of the city's current and future development through analyses derived from sociological, economic, cultural and urban studies perspectives.
