## Geoengineering of the Climate System (Issues in Environmental Science and Technology)

It is generally accepted within the scientific community that anthropogenic emissions of greenhouse gases are primarily responsible for a recent warming in global climate and that current trajectories of emissions may lead to potentially catastrophic changes in climate. While reduction in emissions of greenhouse gases, and particularly carbon dioxide, could lead to a stabilisation of global temperatures, this requires international agreements which have yet to be achieved. A possible alternative, which has been widely mooted is to use methods known as geoengineering as an alternative way of limiting increases in global temperature. Geoengineering techniques fall into two main categories of carbon dioxide removal and solar radiation management; within each of these there are a number of options.

Following on from “Carbon Capture” (volume 29 in this series), Geoengineering of the Climate System presents an overview of the technologies currently being considered as large scale solutions to climate change, and considers some of the possible benefits and disadvantages of each. Invited contributions have been received by many of the leading experts on these technologies, and the volume provides a comprehensive overview of both carbon dioxide reduction and solar radiation management methods. These give rise to important ethical and governance issues which are also explored.

Written with active researchers, postgraduate students and policy-makers in mind, the latest addition to the Issues in Environmental Science & Technology series presents a balanced and informed view of this important field of research and is an essential addition to any environmental science library.

### **From reader reviews:**

#### **Virginia Warriner:**

Book is to be different per grade. Book for children right up until adult are different content. We all know that that book is very important for us. The book Geoengineering of the Climate System (Issues in Environmental Science and Technology) was making you to know about other know-how and of course you can take more information. It is very advantages for you. The e-book Geoengineering of the Climate System (Issues in Environmental Science and Technology) is not only giving you far more new information but also to be your friend when you truly feel bored. You can spend your spend time to read your book. Try to make relationship with all the book Geoengineering of the Climate System (Issues in Environmental Science and Technology). You never feel lose out for everything should you read some books.

#### **Erica Logan:**

Now a day those who Living in the era just where everything reachable by match the internet and the resources in it can be true or not require people to be aware of each info they get. How individuals to be smart in getting any information nowadays? Of course the reply is reading a book. Examining a book can help folks out of this uncertainty Information specially this Geoengineering of the Climate System (Issues in Environmental Science and Technology) book as this book offers you rich data and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it everbody knows.

#### **Tabitha Devore:**

This Geoengineering of the Climate System (Issues in Environmental Science and Technology) tend to be reliable for you who want to be described as a successful person, why. The reason why of this Geoengineering of the Climate System (Issues in Environmental Science and Technology) can be one of the great books you must have is usually giving you more than just simple reading food but feed you with information that might be will shock your prior knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed ones. Beside that this Geoengineering of the Climate System (Issues in Environmental Science and Technology) giving you an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day pastime. So , let's have it and revel in reading.

#### **Rick Beard:**

Your reading 6th sense will not betray an individual, why because this Geoengineering of the Climate System (Issues in Environmental Science and Technology) e-book written by well-known writer whose to say well how to make book that may be understand by anyone who all read the book. Written within good manner for you, still dripping wet every ideas and writing skill only for eliminate your hunger then you still question Geoengineering of the Climate System (Issues in Environmental Science and Technology) as good book not only by the cover but also with the content. This is one reserve that can break don't ascertain book

by its protect, so do you still needing an additional sixth sense to pick that!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.
