## **Fire Effects on Soils and Restoration Strategies (Land Reconstruction and Mangement) A Cerda**

This book has been published a decade after *Fire's Effects on Ecosystems* by DeBano, Neary, and Folliott (1998), and builds on their foundation to update knowledge on natural post-fire processes and describe the use and effectiveness of various restoration strategies that may be applied when human intervention is warranted. The chapters in this book, written by leading scientists, have been compiled to provide relevant and accessible information to students, land managers, and policy-makers as well as other scientists.
