Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students

Jenny Olive

This friendly self-help workbook covers mathematics essential to first-year undergraduate scientists and engineers. In the second edition of this highly successful textbook the author has completely revised the existing text and added a totally new chapter on vectors. Mathematics underpins all science and engineering degrees, and this may cause problems for students whose understanding of the subject is weak. In this book Jenny Olive uses her extensive experience of teaching and helping students by giving a clear and confident presentation of the core mathematics needed by students starting science or engineering courses. The book contains almost 800 exercises, with detailed solutions given in the back to allow students who get stuck to see exactly where they have gone wrong. Topics covered include trigonometry and hyperbolic functions, sequences and series (with detailed coverage of binomial series), differentiation and integration, complex numbers, and vectors.

From reader reviews:

Roy Christy:

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try issue that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students, you may enjoy both. It is excellent combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout fellas. What? Still don't buy it, oh come on its referred to as reading friends.

Kyle Gill:

This Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students is great reserve for you because the content that is full of information for you who have always deal with world and have to make decision every minute. That book reveal it data accurately using great coordinate word or we can claim no rambling sentences inside. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but challenging core information with lovely delivering sentences. Having Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students in your hand like having the world in your arm, data in it is not ridiculous 1. We can say that no e-book that offer you world within ten or fifteen small right but this book already do that. So , this is certainly good reading book. Hi Mr. and Mrs. busy do you still doubt this?

Joshua Matthews:

You may spend your free time you just read this book this reserve. This Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students is simple to bring you can read it in the recreation area, in the beach, train as well as soon. If you did not include much space to bring the printed book, you can buy often the e-book. It is make you much easier to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Johnny Sutton:

On this era which is the greater person or who has ability to do something more are more important than other. Do you want to become certainly one of it? It is just simple approach to have that. What you have to do is just spending your time almost no but quite enough to have a look at some books. One of many books in the top listing in your reading list is definitely Maths: A Student's Survival Guide: A Self-Help Workbook for Science and Engineering Students. This book which can be qualified as The Hungry Mountains can get you closer in turning into precious person. By looking upward and review this e-book you can get many advantages.
