Clinical Problems in Pediatric Urology

Clinical Problems in Pediatric Urology

Pediatric Urology has established itself as a separate subspeciality and is an essential component of the Intercollegiate exams both in Pediatric Surgery (FRCS Paeds) and Adult Urology (FRCS Urol) and the Board exams in the USA. Exposure to Pediatric Urology training is often limited to only one year in most Pediatric surgical training programmes; and is practically non-existent in Adult urology training programmes.

There are several Pediatric Urology textbooks providing factual information and literature reviews; however, problem based learning has been shown to be much more useful than the search and scan approach.

This book covers all the major topics in Pediatric Urology in a "problem solving" format and using numerous illustrations. Most of the information is evidence-based and all problems are representative of those actually encountered in clinical practice.

The contributing authors have key affiliations with societies such as the British Association of Paediatric Surgeons, the British Association of Paediatric Urologists and the European Association of Paediatric Urologists.
