Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series) Jiagu Xu

Olympiad mathematics is not a collection of techniques of solving mathematical problems but a system for advancing mathematical education.

This book is based on the lecture notes of the mathematical Olympiad training courses conducted by the author in Singapore. Its scope and depth not only covers and exceeds the usual syllabus, but introduces a variety concepts and methods in modern mathematics.

In each lecture, the concepts, theories and methods are taken as the core. The examples are served to explain and enrich their intension and to indicate their applications. Besides, appropriate number of test questions is available for reader's practice and testing purpose. Their detailed solutions are also conveniently provided.

The examples are not very complicated so that readers can easily understand. There are many real competition questions included which students can use to verify their abilities. These test questions are from many countries, e.g. China, Russia, USA, Singapore, etc. In particular, the reader can find many questions from China, if he is interested in understanding mathematical Olympiad in China.

This book serves as a useful textbook of mathematical Olympiad courses, or as a reference book for related teachers and researchers.

Contents:

- Operations on Rational Numbers
- Linear Equations of Single Variable
- Multiplication Formulae
- Absolute Value and Its Applications
- Congruence of Triangles
- Similarity of Triangles
- Divisions of Polynomials
- Solutions to Testing Questions
- and other chapters

Readership: Mathematics students, school teachers, college lecturers, university professors; mathematics enthusiasts.

From reader reviews:

Jesse Fox:

What do you consider book? It is just for students because they are still students or that for all people in the world, the particular best subject for that? Just simply you can be answered for that question above. Every person has diverse personality and hobby for every single other. Don't to be obligated someone or something that they don't wish do that. You must know how great in addition to important the book Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series). All type of book would you see on many options. You can look for the internet solutions or other social media.

Kimberly Foust:

Here thing why this particular Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series) are different and trustworthy to be yours. First of all reading a book is good nevertheless it depends in the content from it which is the content is as delightful as food or not. Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series) giving you information deeper and in different ways, you can find any guide out there but there is no book that similar with Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series). It gives you thrill looking at journey, its open up your current eyes about the thing this happened in the world which is maybe can be happened around you. You can actually bring everywhere like in playground, café, or even in your technique home by train. When you are having difficulties in bringing the paper book maybe the form of Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series) in e-book can be your choice.

Nancy Lundy:

The book untitled Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series) contain a lot of information on the idea. The writer explains the woman idea with easy way. The language is very easy to understand all the people, so do certainly not worry, you can easy to read it. The book was published by famous author. The author brings you in the new period of time of literary works. You can actually read this book because you can read on your smart phone, or device, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can available their official web-site along with order it. Have a nice read.

Helen McClain:

Within this era which is the greater particular person or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple strategy to have that. What you are related is just spending your time not very much but quite enough to enjoy a look at some books. One of many books in the top collection in your reading list will be Lecture Notes on Mathematical Olympiad Courses:For Junior SectionVolume 1: 6 (Mathematical Olympiad Series). This book and that is qualified as

The Hungry Mountains can get you closer in growing to be precious person. By looking way up and review this reserve you can get many advantages.
