Zhizheng Wu, Azhar Iqbal, Foued Ben Amara

Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems Zhizheng Wu, Azhar Iqbal, Foued Ben Amara

Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems presents a novel design of wavefront correctors based on magnetic fluid deformable mirrors (MFDM) as well as corresponding control algorithms. The presented wavefront correctors are characterized by their linear, dynamic response. Various mirror surface shape control algorithms are presented along with experimental evaluations of the performance of the resulting adaptive optics systems. Adaptive optics (AO) systems are used in various fields of application to enhance the performance of optical systems, such as imaging, laser, free space optical communication systems, etc.

This book is intended for undergraduate and graduate students, professors, engineers, scientists and researchers working on the design of adaptive optics systems and their various emerging fields of application.

Zhizheng Wu is an associate professor at Shanghai University, China. Azhar Iqbal is a research associate at the University of Toronto, Canada. Foued Ben Amara is an assistant professor at the University of Toronto, Canada.

From reader reviews:

Amber Orłowski:

Book is to be different per grade. Book for children until adult are different content. As it is known to us that book is very important usually. The book Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems seemed to be making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The guide Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems is not only giving you much more new information but also to become your friend when you sense bored. You can spend your own personal spend time to read your guide. Try to make relationship using the book Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems. You never feel lose out for everything in the event you read some books.

Alex Levey:

Here thing why this kind of Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems are different and trusted to be yours. First of all examining a book is good but it depends in the content of the usb ports which is the content is as scrumptious as food or not. Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems giving you information deeper including different ways, you can find any reserve out there but there is no e-book that similar with Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems. It gives you thrill studying journey, its open up your own eyes about the thing this happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in park, café, or even in your method home by train. In case you are having difficulties in bringing the paper book maybe the form of Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems in e-book can be your substitute.

Georgia Lopez:

The actual book Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems has a lot of information on it. So when you check out this book you can get a lot of gain. The book was published by the very famous author. Tom makes some research ahead of write this book. This kind of book very easy to read you can get the point easily after scanning this book.

Denise Wentzel:

Many people spending their time frame by playing outside having friends, fun activity using family or just watching TV all day long. You can have new activity to shell out your whole day by reading a book. Ugh, ya think reading a book can definitely hard because you have to bring the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like Modeling and Control of Magnetic Fluid Deformable Mirrors for Adaptive Optics Systems which is getting the e-book version. So , try out this book? Let's see.
