The SAGE Handbook of GIS and Society

Timothy Nyerges, Helen Couclelis, Robert McMaster

The SAGE Handbook of GIS and Society Timothy Nyerges, Helen Couclelis, Robert McMaster

Over the past twenty years research on the evolving relationship between GIS and Society has been expanding into a wide variety of topical areas, becoming in the process an increasingly challenging and multifaceted endeavour. The SAGE Handbook of GIS and Society is a retrospective and prospective overview of GIS and Society research that provides an expansive and critical assessment of work in that field. Emphasizing the theoretical, methodological and substantive diversity within GIS and Society research, the book highlights the distinctiveness and intellectual coherence of the subject as a field of study, while also examining its resonances with and between key themes, and among disciplines ranging from geography and computer science to sociology, anthropology, and the health and environmental sciences. Comprising 27 chapters, often with an international focus, the book is organized into six sections: Foundations of Geographic Information and Society. Geographical Information and Modern Life. Alternative Representations of Geographic Information and Society. Organizations and Institutions. Participation and Community Issues. Value, Fairness, and Privacy. Aimed at academics, researchers, postgraduates, and GIS practitioners, this Handbook will be the basic reference for any inquiry applying Geographical Information Science to societal issues.
