Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)

Advances in social science research methodologies and data analytic methods are changing the way research in information systems is conducted. New developments in statistical software technologies for data mining (DM) such as regression splines or decision tree induction can be used to assist researchers in systematic post-positivist theory testing and development. Established management science techniques like data envelopment analysis (DEA), and value focused thinking (VFT) can be used in combination with traditional statistical analysis and data mining techniques to more effectively explore behavioral questions in information systems research. As adoption and use of these research methods expand, there is growing need for a resource book to assist doctoral students and advanced researchers in understanding their potential to contribute to a broad range of research problems.

Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking focuses on bridging and unifying these three different methodologies in order to bring them together in a unified volume for the information systems community. This book serves as a resource that provides overviews on each method, as well as applications on how they can be employed to address IS research problems. Its goal is to help researchers in their continuous efforts to set the pace for having an appropriate interplay between behavioral research and design science.

From reader reviews:

Charles Stephens:

The book *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)* can give more knowledge and also the precise product information about everything you want. So just why must we leave the best thing like a book *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)*? A few of you have a different opinion about publication. But one aim in which book can give many details for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or data that you take for that, you are able to give for each other; you are able to share all of these. Book *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)* has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by open up and read a e-book. So it is very wonderful.

Nydia Kelly:

What do you in relation to book? It is not important to you? Or just adding material when you require something to explain what yours problem? How about your free time? Or are you busy person? If you don't have spare time to perform others business, it is make one feel bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question due to the fact just their can do in which. It said that about reserve. Book is familiar on every person. Yes, it is suitable. Because start from on guardería until university need this particular *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)* to read.

Albert Guerra:

Don't be worry in case you are afraid that this book may filled the space in your house, you may have it in e-book method, more simple and reachable. This specific *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)* can give you a lot of good friends because by you considering this one book you have issue that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This publication offer you information that perhaps your friend doesn't realize, by knowing more than additional make you to be great people. So , why hesitate? Let's have *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)*.

Sara Pacheco:

A lot of book has printed but it differs. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, witty, novel, or whatever by searching from it. It is known as of book *Advances in Research Methods for Information Systems Research: Data Mining, Data Envelopment Analysis, Value Focused Thinking: 34 (Integrated Series in Information Systems)*. You can contribute your knowledge by it. Without making the printed book, it may add your knowledge and make you actually happier to read. It is most essential that, you must aware about reserve. It can bring you from one destination for a other place.
