Frank C. Hoppensteadt, Charles S. Peskin

Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics) Frank C. Hoppensteadt, Charles S. Peskin

The result of lectures given by the authors at New York University, the University of Utah, and Michigan State University, the material is written for students who have had only one term of calculus, but it contains material that can be used in modeling courses in applied mathematics at all levels through early graduate courses. Numerous exercises are given as well as solutions to selected exercises, so as to lead readers to discover interesting extensions of that material. Throughout, illustrations depict physiological processes, population biology phenomena, corresponding models, and the results of computer simulations. Topics covered range from population phenomena to demographics, genetics, epidemics and dispersal; in physiological processes, including the circulation, gas exchange in the lungs, control of cell volume, the renal counter-current multiplier mechanism, and muscle mechanics; to mechanisms of neural control. Each chapter is graded in difficulty, so a reading of the first parts of each provides an elementary introduction to the processes and their models.

From reader reviews:

Ismael Roop:

Inside other case, little persons like to read book Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics). You can choose the best book if you love reading a book. Providing we know about how is important the book Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics). You can add understanding and of course you can around the world by just a book. Absolutely right, simply because from book you can understand everything! From your country until finally foreign or abroad you will end up known. About simple point until wonderful thing you may know that. In this era, we can easily open a book or even searching by internet product. It is called e-book. You can use it when you feel bored to go to the library. Let's learn.

Elmer Dooley:

In this 21st century, people become competitive in every way. By being competitive now, people have do something to make these survives, being in the middle of the crowded place and notice through surrounding. One thing that often many people have underestimated it for a while is reading. Sure, by reading a e-book your ability to survive raise then having chance to stand up than other is high. In your case who want to start reading the book, we give you this particular Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics) book as basic and daily reading book. Why, because this book is greater than just a book.

Elizabeth Walborn:

Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics) can be one of your nice books that are good idea. We all recommend that straight away because this e-book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to set every word into pleasure arrangement in writing Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics) yet doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource details that maybe you can be among it. This great information could drawn you into new stage of crucial imagining.

Francis Corder:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you can have it in e-book technique, more simple and reachable. This kind of Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics) can give you a lot of friends because by you looking at this one book you have point that they don't and make an individual more like an interesting person. This book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't recognize, by knowing more than other make you to be great individuals. So , why hesitate? We need to have Modeling and Simulation in Medicine and the Life Sciences (Texts in Applied Mathematics).
