The Chinese Communist Party and China's Capitalist Revolution: The Political Impact of Market (Routledge Contemporary China Series) Lance Gore

The Chinese Communist Party and China's Capitalist Revolution examines issues of political change and development in China. In the last 30 years China has experienced a profound political transformation and a degree of political progress but these are largely mired in the assumption that the free market is inherently incompatible with communism, and the perceived lack of political reforms in China. Indeed, there has not been much in the sense of democratization, multi-party competition, freedom of speech and association, but as this book demonstrates, political development is not limited to these factors.

Based on extensive empirical investigations of the impact of the market on the communist party, with a particular focus on its grassroots organisations, this book finds that the Chinese communist party is undergoing profound changes in a host of important areas. By analyzing the impact of China's socioeconomic transformation on the CCP and the adaptations of the Party to the new environment the book takes stock of the nature and dynamics of political change underway in China. The author concludes that the Chinese communist party we knew no longer exists—it is evolving into something quite different, which must have political implications for both China and the rest of the world.

Professor Lance L. P. Gore is a political scientist specializing in contemporary Chinese politics at The East Asian Institute, National University of Singapore.
