## Climate Change and Global Food Security (Books in Soils, Plants, and the Environment)

In order to feed their burgeoning populations, developing nations will need to double cereal production by the year 2050. This increase will have to come from existing land, as little potential exists for bringing new land under cultivation -- a daunting prospect when one realizes that increased use and significantly higher concentrations of carbon dioxide have led to a severe depletion of the carbon pool in the world's soils. This is especially telling in developing countries where tropical climates further compromise the soil's ability to recover.

In *Climate Change and Global Food Security*, bestselling editor Rattan Lal heads up a team of the world's top soil scientists and ecologists to document the history of this impending agricultural crisis and explore possible solutions. Throughout this timely text, the authors address six complex themes:

1. The impact of projected climate change on soil quality, water resources, temperature regime, and growing season duration on net primary productivity of different biomes
2. Soil carbon dynamics under changing climate
3. The impact of changes in carbon dioxide and ecological environments on agronomic yields and food production in different regions of the world
4. World food demands and supply during the 21st century
5. Policy and economic issues related to carbon trading and enhancing agricultural production
6. Research and development priorities for enhancing soil carbon pool and food security

This hard-hitting text is essential reading for anyone involved with soil and crop sciences as well as policy makers and change agents who need to come to the forefront of this issue armed with the latest information and viable solutions.

### **From reader reviews:**

#### **Freida Gilbert:**

This Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) book is not really ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is actually information inside this publication incredible fresh, you will get info which is getting deeper an individual read a lot of information you will get. That Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) without we understand teach the one who examining it become critical in considering and analyzing. Don't become worry Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) can bring when you are and not make your carrier space or bookshelves' become full because you can have it in your lovely laptop even telephone. This Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) having good arrangement in word along with layout, so you will not truly feel uninterested in reading.

#### **James Alvarez:**

As people who live in the modest era should be revise about what going on or info even knowledge to make these people keep up with the era and that is always change and progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for yourself but the problems coming to an individual is you don't know which one you should start with. This Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) is our recommendation to help you keep up with the world. Why, because book serves what you want and need in this era.

#### **Mindy Munson:**

The e-book with title Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) has lot of information that you can discover it. You can get a lot of gain after read this book. This particular book exist new knowledge the information that exist in this publication represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book on the smart phone, so you can read the item anywhere you want.

#### **William McCown:**

Do you like reading a publication? Confuse to looking for your chosen book? Or your book was rare? Why so many question for the book? But almost any people feel that they enjoy to get reading. Some people likes studying, not only science book but also novel and Climate Change and Global Food Security (Books in Soils, Plants, and the Environment) or maybe others sources were given know-how for you. After you know how the good a book, you feel would like to read more and more. Science e-book was created for teacher or even students especially. Those publications are helping them to increase their knowledge. In other case, beside science reserve, any other book likes Climate Change and Global Food Security (Books in Soils,

Plants, and the Environment) to make your spare time much more colorful. Many types of book like here.
