Lower K- and L-theory (London Mathematical Society Lecture Note Series) Andrew Ranicki

This is the first unified treatment in book form of the lower K-groups of Bass and the lower L-groups of the author. These groups arise as the Grothendieck groups of modules and quadratic forms which are components of the K- and L-groups of polynomial extensions. They are important in the topology of non-compact manifolds such as Euclidean spaces, being the value groups for Whitehead torsion, the Siebemann end obstruction and the Wall finiteness and surgery obstructions. Some of the applications to topology are included, such as the obstruction theories for splitting homotopy equivalences and for fibering compact manifolds over the circle. Only elementary algebraic constructions are used, which are always motivated by topology. The material is accessible to a wide mathematical audience, especially graduate students and research workers in topology and algebra.

From reader reviews:

Daniel Butler:

This Lower K- and L-theory (London Mathematical Society Lecture Note Series) are reliable for you who want to be a successful person, why. The key reason why of this Lower K- and L-theory (London Mathematical Society Lecture Note Series) can be one of many great books you must have is giving you more than just simple studying food but feed anyone with information that probably will shock your prior knowledge. This book is usually handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed people. Beside that this Lower K- and L-theory (London Mathematical Society Lecture Note Series) forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day action. So , let's have it appreciate reading.

Jacob Keys:

The book Lower K- and L-theory (London Mathematical Society Lecture Note Series) will bring you to the new experience of reading a new book. The author style to spell out the idea is very unique. In the event you try to find new book to learn, this book very acceptable to you. The book Lower K- and L-theory (London Mathematical Society Lecture Note Series) is much recommended to you you just read. You can also get the e-book from your official web site, so you can quickly to read the book.

Lou Whisenhunt:

Playing with family in a park, coming to see the ocean world or hanging out with good friends is thing that usually you will have done when you have spare time, subsequently why you don't try issue that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Lower K- and L-theory (London Mathematical Society Lecture Note Series), it is possible to enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh seriously its mind hangout men. What? Still don't have it, oh come on its known as reading friends.

William Jones:
