A Companion to Translation Studies is the first work of its kind. It provides an authoritative guide to key approaches in translation studies. All of the essays are specially commissioned for this collection, and written by leading international experts in the field. The book is divided into nine specialist areas: culture, philosophy, linguistics, history, literary, gender, theatre and opera, screen, and politics. Each chapter gives an in-depth account of theoretical concepts, issues and debates which define a field within translation studies, mapping out past trends and suggesting how research might develop in the future.
