Fish Physiology: Homeostasis and Toxicology of Essential Metals

Fish Physiology: Homeostasis and Toxicology of Essential Metals

Homeostasis and Toxicology of Essential Metals synthesizes the explosion of new information on the molecular, cellular, and organismal handling of metals in fish in the past 15 years. These elements are no longer viewed by fish physiologists as "heavy metals" that kill fish by suffocation, but rather as interesting moieties that enter and leave fish by specific pathways, which are subject to physiological regulation. The metals featured in this volume are those about which there has been most public and scientific concern, and therefore are those most widely studied by fish researchers. Metals such as Cu, Zn, Fe, Ni, Co, Se, Mo and Cr are either proven to be or are strongly suspected to be essential in trace amounts, yet are toxic in higher doses.

The companion volume, *Homeostasis and Toxicology of Non-Essential Metals*, Volume 31B, covers metals that have no known nutritive function in fish at present, but which are toxic at fairly low levels, such as Ag, Al, Cd, Pb, Hg, As, Sr, and U. In addition, three chapters in Volumes 31A and 31B on Basic Principles (Chapter 1, 31A), Field Studies and Ecological Integration (Chapter 9, 31A) and Modeling the Physiology and Toxicology of Metals (Chapter 9, 31B) act as integrative summaries and make these two volumes a vital set for readers.

- All major essential metals of interest are covered in metal-specific chapters
- Each metal-specific chapter is written by fish physiologists/toxicologists who are recognized authorities for that metal
- A common format is featured throughout this two volume edition

From reader reviews:

Helen Thibodeaux:

The book Fish Physiology: Homeostasis and Toxicology of Essential Metals make one feel enjoy for your spare time. You can utilize to make your capable considerably more increase. Book can for being your best friend when you getting tension or having big problem with your subject. If you can make examining a book Fish Physiology: Homeostasis and Toxicology of Essential Metals to get your habit, you can get much more advantages, like add your current capable, increase your knowledge about several or all subjects. You are able to know everything if you like open and read a reserve Fish Physiology: Homeostasis and Toxicology of Essential Metals. Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this publication?

Maurice Henkel:

Now a day those who Living in the era where everything reachable by connect to the internet and the resources inside it can be true or not need people to be aware of each info they get. How people have to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Studying a book can help persons out of this uncertainty Information particularly this Fish Physiology: Homeostasis and Toxicology of Essential Metals book because book offers you rich information and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it everbody knows.

Randall Hernandez:

Information is provisions for people to get better life, information today can get by anyone at everywhere. The information can be a understanding or any news even restricted. What people must be consider if those information which is in the former life are hard to be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen within you if you take Fish Physiology: Homeostasis and Toxicology of Essential Metals as your daily resource information.

Ernie Fleishman:

Is it you actually who having spare time in that case spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Fish Physiology: Homeostasis and Toxicology of Essential Metals can be the answer, oh how comes? A book you know. You are thus out of date, spending your spare time by reading in this new era is common not a geek activity. So what these guides have than the others?
