## **A Critical History of Contemporary Architecture: 1960-2010** David Rifkind

This book provides a comprehensive, critical overview of the developments in architecture from 1960 to 2010. The first section provides a presentation of major movements in architecture after 1960, and the second, a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors, but also charts a middle course between the 'aesthetic' histories that examine architecture solely in terms of its formal aspects, and the more 'ideological' histories that subject it to a critique that often skirts the discussion of its formal aspects.
