Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) D. J. Benson

This is the second of two volumes which will provide an introduction to modern developments in the representation theory of finite groups and associative algebras. The subject is viewed from the perspective of homological algebra and the theory of representations of finite dimensional algebras; the author emphasises modular representations and the homological algebra associated with their categories. This volume concentrates on the cohomology of groups, always with representations in view, however. It begins with a background reference chapter, then proceeds to an overview of the algebraic topology and K-theory associated with cohomology of groups, especially the work of Quillen. Later chapters look at algebraic and topological proofs of the finite generation of the cohomology ring of a finite group, and an algebraic approach to the Steenrod operations in group cohomology. The book cumulates in a chapter dealing with the theory of varieties for modules. Much of the material presented here has never appeared before in book form. Consequently students and research workers studying group theory, and indeed algebra in general, will be grateful to Dr Benson for supplying an exposition of a good deal of the essential results of modern representation theory.

From reader reviews:

Alma Bulger:

What do you consider book? It is just for students as they are still students or that for all people in the world, exactly what the best subject for that? Just you can be answered for that query above. Every person has different personality and hobby for each other. Don't to be pushed someone or something that they don't would like do that. You must know how great and also important the book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics). All type of book is it possible to see on many options. You can look for the internet resources or other social media.

Darius Cramer:

Book is to be different for each and every grade. Book for children right up until adult are different content. As we know that book is very important for all of us. The book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) seemed to be making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) is not only giving you much more new information but also to be your friend when you feel bored. You can spend your current spend time to read your book. Try to make relationship with the book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics). You never truly feel lose out for everything should you read some books.

Coleman Bailey:

People live in this new day time of lifestyle always aim to and must have the extra time or they will get large amount of stress from both lifestyle and work. So , when we ask do people have extra time, we will say absolutely indeed. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to a person of course your answer can unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, often the book you have read is usually Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics).

Derick Heinz:

Publication is one of source of expertise. We can add our know-how from it. Not only for students but also native or citizen will need book to know the update information of year in order to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can also bring us to around the world. With the book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics) we can take more advantage. Don't that you be creative

people? To be creative person must choose to read a book. Only choose the best book that appropriate with your aim. Don't possibly be doubt to change your life by this book Representations and Cohomology: Volume 2, Cohomology of Groups and Modules (Cambridge Studies in Advanced Mathematics). You can more attractive than now.
