This is the second of three related, empirically based studies examining the broad range of issues raised by the use of economic sanctions. This volume provides a detailed examination of the impact of U.S. economic sanctions on China, Cuba, and Iran as well as the impact on the United States itself.

Ashari, Forrer, Teegen, and Yang analyze whether or not these case studies in economic sanctions had been successful by measuring their historical impact and modeling their effectiveness. This book will be of particular interest to scholars, students, researchers, and the public policy community involved with international business and economics and international relations.
