Algebraic Functions and Projective Curves (Graduate Texts in Mathematics)

David Goldschmidt

Algebraic Functions and Projective Curves (Graduate Texts in Mathematics)

David Goldschmidt

Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) David Goldschmidt

This book gives an introduction to algebraic functions and projective curves. It covers a wide range of material by dispensing with the machinery of algebraic geometry and proceeding directly via valuation theory to the main results on function fields. It also develops the theory of singular curves by studying maps to projective space, including topics such as Weierstrass points in characteristic p, and the Gorenstein relations for singularities of plane curves.

From reader reviews:

Susan Chestnut:

Book is definitely written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. To be sure that book is important thing to bring us around the world. Adjacent to that you can your reading ability was fluently. A publication Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) will make you to always be smarter. You can feel far more confidence if you can know about almost everything. But some of you think in which open or reading a new book make you bored. It isn't make you fun. Why they could be thought like that? Have you seeking best book or appropriate book with you?

Beatrice Rogers:

The reserve untitled Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) is the e-book that recommended to you you just read. You can see the quality of the e-book content that will be shown to you. The language that creator use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, therefore the information that they share to you is absolutely accurate. You also could get the e-book of Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) from the publisher to make you far more enjoy free time.

Patrice Reese:

The reserve with title Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) has lot of information that you can study it. You can get a lot of benefit after read this book. This book exist new know-how the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This specific book will bring you throughout new era of the globalization. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Juanita Stoneman:

Guide is one of source of knowledge. We can add our knowledge from it. Not only for students but also native or citizen want book to know the update information of year to help year. As we know those publications have many advantages. Beside most of us add our knowledge, also can bring us to around the world. With the book Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) we can get more advantage. Don't one to be creative people? To be creative person must prefer to read a book. Just choose the best book that suitable with your aim. Don't always be doubt to change your life with that book Algebraic Functions and Projective Curves (Graduate Texts in Mathematics). You can more inviting than now.
